

Press Release – 5 August 2013

Full Transparency in Australia for all Retail Leasing markets

Leasing Information Services ('LIS') is the largest independent provider of retail leasing data in Australia. Our company is committed and fully supports the principles of full transparency in all retail leasing markets, including the registration of all incentives and other such matters that are currently kept hidden in side deeds.

The managing director of LIS, Mr Simon Fonteyn states that "LIS supports the registration of all incentives as part of the lease, in retail leases in Australia in the public domain. This is the basis from which we provide our data. Incentives are a significant part of the retail leasing market and we will continue to collect and report on them, when they become available."
